

# Meet our event leaders!

**Lillooet and Area Bioblitz** walk leaders June 3-4, 2023.  
Nature Walk Schedule coming soon with sign-up details!

## **Tyler Kelly**

Tyler is an ecologist and pollinator expert with the Working to Restore Connectivity and Sustainability Laboratory at the University of British Columbia. The majority of his work has focused on plant-pollinator interactions in the Pacific and intermountain regions of North America. He is an avid naturalist and is frequently invited to give pollinator ecology, biodiversity, and identification workshops. He is currently one of a handful of professionals in western Canada who is capable of identifying bees and other pollinators to the species level.

## **Dr. Ian Routley**

Ian is a rural physician with a life long interest in the natural world. As the regional coordinator for the Breeding Bird Atlas of BC he has had the opportunity to spend a lot of his free time exploring the local environs looking for birds.

## **John Redan**

John is a member of the Sekw'elwas and Qaqy'ten community. He works as a Lands Use Advisor and Environmental and Fisheries Technician at Splitrock Environmental. John has earned an extensive list of technician certifications, and he contributes to land use responsibilities through mapping for community and company. When not at work, John enjoys video games, socializing and admiring the great outdoors.

## **Odin Scholz**

Odin is a Restoration Ecologist at Splitrock Environmental with over 20 years of experience in the field. He has a B.Sc in Environmental Science and is a certified environmental professional with a specialization in site assessment and reclamation. Odin has a passion for native plants and understanding the natural patterns in landscapes.
