Total Individuals	1715				
Total Species Reported	56				

cw = Reported count week  
 US = Flagged as an unusual species  
 HC = Flagged as an unusually high count  
 LC = Flagged as an unusually low count

## Species Requiring Rare Bird Reports to be Submitted to Regional Editor

Species

### Special Aspects

Cold day with gusting winds. Northern Pygmy-owl identified on count day turned out to be a Boreal Owl based on photos (fortunately) taken at the time. Unfortunately for this compiler, that would have been a lifer for me, but the bird had left its roosting site by the time the mistake was figured out.

Despite not dedicated Owling time we did quite well for Owls on this count when count week Owls were included.
